Fruit Font 10-11

1. This illustration of a banana was created by Andy Warhol. It's was made for 'The Velvet Underground & Nico's debut album and became iconic enough to land the Warhol Foundation a deal with Apple to create accessories with the image. This also led to the band suing the foundation for breach of contract.

P.S.

The court decided that both parties could use the design, and the banana came swinging in as the newest trend in design!
